**A Message from the Editor**

Hi Everyone,

If you are working on a project, doing repairs take a picture, and send me a short blurb about it. A lot of you take short trips out and about to small airstrips, to lunch stops, and airplane museums. We would like to hear about it and share your story. Also if you hear of an event that is not listed in the newsletter or our web site, please email me with the information. This is “**your**” chapter newsletter, and thanks to those who have sent me material. As you read the articles in this newsletter you can appreciate the articles by fellow members. It sure makes reading the newsletter a better experience for us all.

Got this one to open. Thanks. I flew the 747-100 and -200. These were the

Earliest models of the 747. The 100 had a max takeoff wt. Of 734,000# and

The -200 max t.o. Wt of 775,000#. I had an engine come apart on a -100 on

Takeoff out of Rome just at V-1. We weighed 734,000 and I elected to stop.

It took us nearly the entire runway of 12,000 ft. To stop and it felt like

The Empire State building was pushing us from behind. Needless to say the

Brakes got pretty hot. I bet it will be a thrill stopping this cargo beast

Just at V-1.
